PROJECTS

Financial Sector Web Development

- Delivered 50+ production websites for banks and credit unions using DNN CMS across full development lifecycle.
- Improved page load performance by up to 80% through responsive redesign and optimization initiatives.
- Achieved full WCAG accessibility compliance across institutional client platforms.

Personal Development Projects

- Built functional web apps (Calorie Counter, Checklist, Travel Itinerary) implementing state management and CRUD operations.
- Developed responsive, mobile-first UIs using React, Tailwind CSS, and modern JavaScript (ES6+).
- Managed 10+ GitHub repositories using structured version control and deployment workflows.

EXPERIENCE

Web Developer — FIS, St. Petersburg, FL
February 2012 – Present

- Develop and maintain custom banking websites using DNN CMS across full project lifecycle.
- Eliminated legacy support backlog and established same-day ticket resolution workflow.
- Translate business and client requirements into scalable UI solutions and system specifications.
- Implement responsive design, performance optimization, and accessibility best practices for financial clients.
- Supported enterprise financial clients across multiple institutions nationwide.

Account Manager — FIS, St. Petersburg, FL
November 2006 – January 2012

- Supported financial institutions across multiple enterprise applications and service platforms.
- Managed high-volume inbound and outbound client communications with consistent SLA compliance.
- Improved operational efficiency through structured workflow and time management practices.

- Exceeded client satisfaction targets based on executive feedback and performance evaluations.
